# Marginalia at the Centre: Contrasting Readings of Grotius' De iure belli ac pacis

Forschungszentrum Gotha der Universität Erfurt  
26. November 2019

The workshop explores the extraordinary variety of uses to which Hugo Grotius's *De iure belli ac pacis* was put. We do so by case studies of marginal annotations in Grotius's work by four strikingly different readers. The first is the ultra-orthodox Lutheran professor of theology Ernst Salomo Cyprian (1673-1745), whose copy of Grotius is preserved in the Gotha Forschungsbibliothek where he was librarian for many years. Second is the Mainzer statesman and scholar, Johann Christian von Boineburg (1622-72), who converted to catholicism, and whose extensive library, including Grotius's work, is in the. Third is the Hallenser pietist Carl (1667-1719), founder of the Cansteinsche Bibelanstalt, whose Grotius is in the Bibliothek der Franckeschen Stiftungen. Finally, we consider a copy of *De iure belli* in the British Library whose anonymous marginalia appear to have close links to the teaching of the jurist Johann Jacob Vitriarius (1679-1745) in Leiden in the 1730s.
