

## Workshop

# Mapping Spatial Relations, their Perceptions and Dynamics: the City Today and in the Past

May 18, 2012 | Venue I: Internationales Begegnungszentrum der Universität Erfurt, Michaelisstraße 38, Venue II: Am Hügel 1, Raum 406, Erfurt

### Program

|               |                                                                                                                                                                                                                                                                                                                                                                                |               |                                                                                                                                                                                                                                                                               |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9.00 – 11.00  | <b>Introduction, first lectures:</b><br><b>Susanne Rau (Erfurt):</b><br>Welcome and Opening<br><br><b>Manel Guàrdia Bassols (Barcelona):</b><br>Long-term structures of urban space.<br>Barcelona as a case-study.<br><br><b>Ekkehard Schönherr (Erfurt):</b><br>Elements of historical knowledge<br>about urban spaces. Reflections on<br>the requirements for a dynamic map. | 14.45 – 16.45 | <b>Lectures and discussion:</b><br><b>Richard Rodger (Edinburgh):</b><br>The VUG-Project – Visualising<br>Urban Geographies. (via Skype)<br><br><b>Leif Scheuermann (Stuttgart):</b><br>On co-productive web-based<br>digital mapmaking. Preconditions,<br>risks and chances. |
| 11.00 – 11.30 | <b>Coffee break</b>                                                                                                                                                                                                                                                                                                                                                            | 16.45 – 17.30 | <b>Break, Change of location<br/>to venue I and Coffee</b>                                                                                                                                                                                                                    |
| 11.30 – 13.00 | <b>Lecture and discussion:</b><br>Bernard Gauthiez/Olivier Zeller<br>(Lyon): Lyon, the spatial analysis of a<br>city in the 17-18th centuries. Locating<br>and crossing data in a GIS built from<br>written sources.                                                                                                                                                           | 17.30 – 19.30 | <b>Lecture and discussion,<br/>Conclusion:</b><br><b>Georg Gartner (Vienna):</b><br>Putting emotions in maps –<br>The wayfinding example.<br><br><b>Wolfgang Spickermann (Erfurt):</b><br>Commentary                                                                          |
| 13.00 – 14.45 | <b>Lunchtime, Change of location<br/>to venue II</b>                                                                                                                                                                                                                                                                                                                           |               | <b>Final Discussion</b><br><br><b>Susanne Rau (Erfurt):</b><br>Summary and Acknowledgement                                                                                                                                                                                    |
